Discussion Points

u

Be sure to update Dr. Ezekiel on progress ahead of meetings

Tasks

Team

- o Implement a static dataset model
- o Work towards a detection algorithm for live feed data

Jared

- o Assist with on-boarding
- o Implement a simulated federated algorithm using Flower on the static model.

Drew

- o Prepare all current students for handover, especially Micah for the Zeek-Kafka server.
- o Continue to finalize the IoT paper.

Micah

- Continue to run the various implementations of DCNN, and run them with varying test/train splits.
- Help with any on boarding for Nicholas and new members.

Justin

- Troubleshoot the XGBoost algorithm for the static dataset and begin developing the SVM algorithm.

Nicholas

- Learn more about the Kafka Integration.
