		EC 345/346 sequence. The Department of Economics proposes to move from the current theory/application split to the more traditional

3. As the current course descriptions for EC 345/346 show, the courses were originally designed to cover theories of international trade and international payments in EC 345 International Economics I, and then to devote EC 346 International Economics II to applications. Our experience in the last twelve years shows that this course design does not work well, hence the need for revision.

microeconomic/macroeconomic division.

The current division of topics suggests that we 'defer' policy applications until

I.	Catalog	Description
----	---------	-------------

]	EC 346 International Payments				
•	rerequisites: EC 121 and EC 122 or permission of the instructor.				

3c-01-3sh

Study of the macroeconomic segment of international specialization and exchange, including analysis of balance of payments, exchange rates, and the mechanism of international economic and monetary adjustments; international macroeconomic policy; historical survey and examination of current international financial problems; and the institutional setting of international payments.

#### II. Course Objectives

This course aims at helping students understand

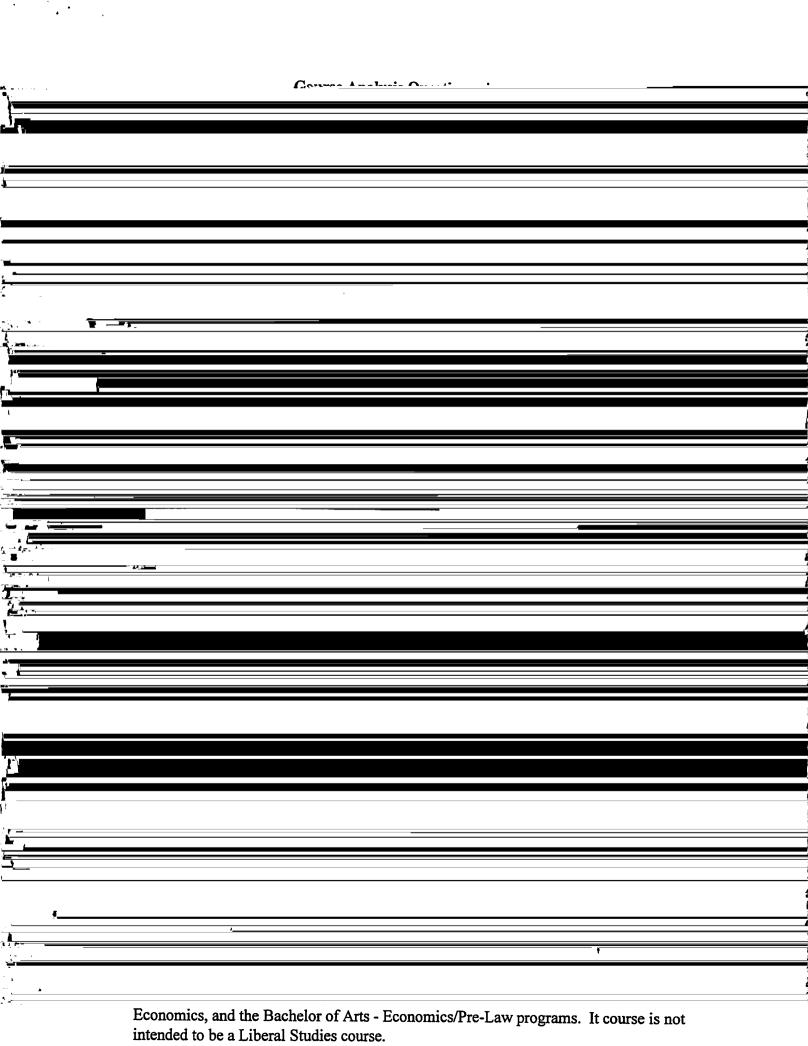

1. The tools used by economists to record and renort international financial settlements

- 2. Foreign exchange markets and theories that explain how the exchange rate of currencies are determined.
- 3. Balance of payments disequilibria, their impact on the domestic economy, why they require correction (or adjustment), and balance of payments adjustment policies.
- 4. The international monetary system and its history.
