

**Developing and Assessing Clear Course Outcomes
Reflective Practice Large Group Meeting
Thursday, October 4, 2018
12:30-2:00 p.m.
Allegheny Room, HUB**

What are student learning outcomes? How do I verify that the outcomes have been met?
In this interactive large group meeting, participants will have an opportunity to list

Suskie J. (2018). *Assessing student learning: A common-sense approach*. Wiley, 80 pp.

...the most common-sense approach to assessing student learning is to use a variety of assessment methods and to assess learning outcomes that are directly related to the program's mission and vision. This approach is based on the idea that different assessment methods can provide different types of information about student learning, and that assessing learning outcomes that are directly related to the program's mission and vision will provide the most useful information about student learning.
